## OUR VISION

To be a world class centre for professional learning driven by professionalism, dynamism, innovation and good value systems.

## OUR MISSION

To enhance professional quality in organizations by educating and training a new generation of professionals, who will have high level of professionalism, with a good value system and an understanding of their social responsibilities.

## OUR BELIEF

We firmly believe that legal education should not just aim at professionalism, but should also place high level of importance to social values and hence legal education should transcend the boundaries of academics and be relevant to the changing corporate and social requirements. We will make our programme highly relevant to the changing corporate needs and will keep innovating for the future. We will place high emphasis in our programmes for ethical values and social responsibility.

## QUALITY POLICY

- By being socially responsible to humanity
- By providing a pollution free, lush green, beautiful & impressive campus
- By providing counseling services for assisting students in preparing for higher studies & competitive examinations

## HOW ARE WE DIFFERENT

The social and economic development of a country is crucially dependent upon business enterprises as they contribute to the national income. The business houses, and industries and those who supply products and services also create employment for the people. These enterprises are operating in a fast changing world with technology, and new business processes getting introduced at a very fast pace. The speed at which many of the corporates are expanding, acquiring and consolidating, is an indicator of the changing scenario. Critical issues like fair dealing, corporate social responsibility etc. on the other hand are gaining momentum, thus making the changes and innovations more challenging. The dynamics of change calls for some basic changes in the professional educational system.

Are professional skills alone good enough for the success in corporate sector?

The era of globalization is making products and service move in a borderless economic world, creating business challenges which were not there earlier. Today's professional require more demanding skills which are highly relevant to the customer's needs.

## OUR APPROACH TO PROFESSIONAL EDUCATION

This calls for a unique training of the aspiring professionals not only in terms of skills, but also to develop them to become good citizens who are culturally adaptable to the global environment without sacrificing the basic values of life. The Academic curriculum in professional education needs to adapt to the professional standards being demanded today from the Managers of enterprises. Professional education must imbibe self confidence to the trainees and the future professionals. As the industry needs are changing every day the course curriculum should be adapted to these changes. The syllabus also has to include a lot of soft skills apart from professional knowledge.

The need is to train the students with an overall personality and not just stop with developing professional skills so as to enable them to easily adapt to the corporate world which they have to finally enter. We also realize the need for students to be well informed about highly contemporary issues that are confronting and affecting the world environment. Students should value culture and ethics and be respectable citizens rather than just professionals.

We give due weightage to factors like personality development, communication and interpersonal skills in curriculum while addressing the latest trends and developments in the respective professional arena. We want our students to stand out in the crowd and be respected for what they are and what they are capable of. A good loading of case studies in the curriculum shall be provided for, since the case study method involves a great deal of interaction and deliberation which makes learning easy and effective.

## **CAMPUS**

“Bricks & mortar do not make an Institute.” However, these are the paraphernalia needed to keep body and mind in the right direction. The Innovative family firmly believes that the learning experience extends beyond the four walls of a class room. Nevertheless, infrastructure is the base on which a good Educational Environment can be built, and hence we have provided the best possible infrastructure also.

Our Campus spread over an area of 5.75 Acres is situated in a clean, peaceful and pollution-free environment best suited to academic pursuits located next to India Expo Mart, Greater Noida. Such environment provides students the opportunity to study in the lap of nature for the development of free thoughts & creative minds.
